Planning Processes: The Spectrum of Public Participation

RCW 36.70A.140: “Each county and city that is required or chooses to plan...shall establish and broadly disseminate to the public a **public participation program** identifying procedures providing for **early and continuous public participation** in the development and amendment of comprehensive land use plans and development regulations implementing such plans.”

Planning Processes: Participation for Individuals

- **GOAL:** Effective public participation promotes a transparent, inclusive, and fair decision-making process.

- **OBJECTIVES:**

- Public involvement should be as early as possible in the process as soon as value judgements become salient.
- Public participants should have access to the appropriate resources in order to make a meaningful contribution to decision-making.

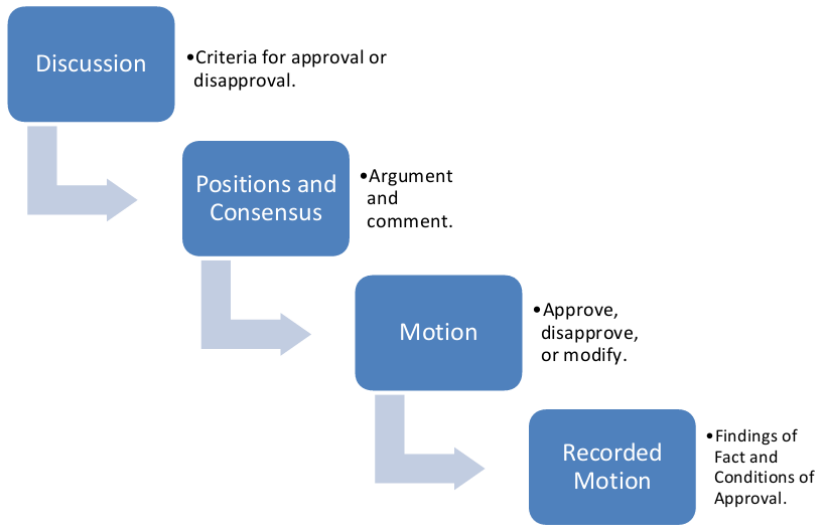

- **ACTIONS:** Stay informed and remember that fundamental choices are made at the time of planning, not permitting.
